Experience

Core Member, Robo-Vitics Club

VIT UNIVERSITY (Vellore)

- Spearheaded frontend development on technical projects, enhancing the digital presence and functionality of club initiatives. Organized workshops, seminars, and technical talks to enhance member skills and knowledge.
- Collaborated with cross-functional teams to create and implement user-focused design solutions and strategic project plans.

Projects

Personal Finance Management Application

Website: [Finance Management](#)

Role: Full Stack Developer

- Developed a full-stack application for expense tracking using React.js, Firebase Authentication, and Firestore.
- Implemented secure user login, email verification, and real-time data updates.
- Designed a responsive UI with features for categorizing expenses, setting budgets, and viewing financial reports.

Hack-e-Thone Website

Website: [Vortex 360](#)

Role: Frontend Developer

- Collaborated with a team of 4 to design and develop the Hack-e-Thone website, "Vortex 360."
- Integrated 3D elements using Three.js and implemented a custom cursor for enhanced user interface.
- Created wireframes, prototypes, and tested designs to ensure a seamless and engaging user experience.

Tic-Tac-Toe (3 Move Restriction Version)

Website: [Tic-Tac-Toe](#)

Role: Full Stack Developer

- Independently designed and developed a web-based Tic Tac Toe game with innovative gameplay mechanics.
- Introduced a rule where the fourth move replaces the first after three moves, adding strategy and engagement.
- Implemented an intuitive user interface and robust functionality for a dynamic gaming experience.
