SUMMARY:

Final-year CS undergrad at VIT Vellore skilled in full-stack and scalable system development. Experienced in building high-performance web applications and ML pipelines using Python, Java, and modern JavaScript frameworks. Solved 650+ DSA problems and adept at debugging, system design, and large-scale data handling.

SKILLS SUMMARY:

Programming Languages: Python, Java, C++, C#, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: React.js, Express.js, Node.js, EJS, Tailwind CSS, Three.js, scikit-learn

Systems & Tools: Git, GitHub (CI/CD), Postman, AWS (Academy Certified), Firebase, VS Code, Figma

Core Computer Science: Distributed Systems, System Design, DSA, OOP, DBMS, OS, REST APIs, Testing & Debugging

Additional: Accessibility Best Practices (WCAG 2.1), Large-Scale System Design & Optimization, Code Review Practices, Testing & QA

Other Skills: Responsive Web Design, Code Optimization, Debugging, Agile/Scrum Methodologies

PROJECTS:

Machine Learning-Powered Fake News Classification Pipeline | *Python, scikit-learn, Streamlit, joblib*

- Designed and implemented an end-to-end ML pipeline using TF-IDF feature extraction and Logistic Regression, achieving 75%+ accuracy on real-world datasets.
- Built a responsive, accessible Streamlit application supporting real-time and batch classification with probabilistic confidence scoring.
- Executed complete data preprocessing, feature engineering, model training, and joblib-based serialization for efficient deployment and inference.
- Deployed on Streamlit Community Cloud, ensuring scalable performance, low-latency inference, and reliable user experience.

Personal Finance Management Application | *EJS, Express.js, Firebase Authentication, Firestore*

- Developed and deployed a secure, full-stack expense tracking platform with real-time data sync, role-based authentication, and optimized backend architecture to support high concurrency with minimal latency.
- Implemented budget tracking, category-based expense classification, and interactive financial reports with responsive UI.
- Integrated Firebase Authentication and Firestore for secure, high-performance data storage and retrieval.

Vortex 360 Hackathon Website | *React.js, Three.js and Tailwind CSS*

- Engineered a responsive hackathon website for 100+ participants, integrating interactive 3D visuals using Three.js for enhanced engagement.
- Optimized cross-browser and cross-device performance, reducing load times by 30% through asset compression and lazy loading.
- Collaborated with designers in iterative design reviews to ensure brand consistency, intuitive navigation, and accessibility compliance.
- Applied modular React architecture for maintainability, scalability, and rapid feature iteration.

EDUCATION:

Vellore Institute of Technology, Vellore, India

Bachelor of Technology – Computer Science

CGPA: 8.16* (Expected Graduation 2026)

Sep 2022 – Present

Macro Vision Academy, India

Class 12 – Central Board of Secondary Education (CBSE)

Percentage: 86.6%

Apr 2020 – Jun 2022

ACHIEVEMENTS AND CERTIFICATIONS:

- AWS Academy Graduate ([Certificate](#))
 - Solved 650+ DSA problems across LeetCode, CodeChef, and Codeforces; participated in 21 contests and earned 6 challenge badges – codolio.com/profile/Tanay_Naik
 - The Complete 2024 Web Development Bootcamp ([Udemy](#))
-
